Page: 1

There are three manuals and the cost is 10.00 in total. At the foot of this page you will see previews of the three documents. Once you have paid you will be directed to a download page with links to three.pdf documents. Please make sure your computer can open.pdf files. You can get free downloads to open.pdf files here. The fireplaces are largely unsupported and the companies that have inherited them do not know anything about them and cannot provide manuals. You can find the manuals elsewhere, but this is simply a quicker and easier alternative. If you wish to contact us you can do so through the contact form on our contact page. The Cannon brand is today part of Indesit Company UK; one of Europe's largest manufacturers and suppliers of white goods kitchen appliances through its Hotpoint, Indesit and Scholtes brands. All of our boiler manuals are free to download from our boiler manuals section They are available as radiant fires, LFE living flame effect and in recent years you can get a variety of fake fuel beds such as coals, pebbles and wood. We have a large range in stock at DHS and if you are unsure please give us a call. Please refer to our privacy policy for more info. We will source it from our suppliers and aim to get it to you within 3 5 working days. Favouring an inset installation, you can use it with fabricated flue or a brick chimney. It comes with a slide control and is totally natural. Finished in brass, this product features a solid cast fascia and hence gives a living flame effect. For additional safety, an Airwatch system and a flame supervision device are included. It is backed by a sevenyear guarantee from the maker against manufacturing defects. Builders opening sizes Minimum Height 550mm and Maximum Height 570mm Minimum Width 400mm and Maximum Width 450mm Specification of Slide Control Convenient control that eliminates the necessity of bending down Specification of Brick Chimney Class 1 ApartSpecification of PreFabricated flue Class 2 Prefabricated flues are easily identifiable by a metal flue and terminal on the roof and a metal flue box behind the fire. Specification of PreCast flue PrecastConforming to BS EN 1858. Fire was fitted quickly into surround that had contained the CANNON Caress fire. In theory it is not as efficient as the old fire but heat output is good and it looks a bit more realistic. We were surprised how hot the brass surround became so you have to make sure you touch the insulated portion of the handle when adjusting the flame.. Slide control is rather sensitive and has no notches to give feedback so adjustment of flame can be tricky. We are very pleased with our purchase and the price was the best we could find. There are no words that can really help me explain my joy regarding this product. It is simply stunning.

Firstly let me rate its performance with a full five stars and a four for its looks which makes the room look lively and has a very positive aura that spreads cheer during cold winter days. We have experienced its performance for one winter and feel it's worth every penny. Its performance is great in generation of heat but a little less in efficiency. Still it comes for a steal deal price from QS making it worthy of four stars from five. Shipping Cost Of This Item We also follow an uptodate tracking system to keep you posted on the status of your orders. Delivery dates are approximate, and therefore, we suggest you do not schedule any installation work until you have received the items. To learn more about our delivery service, click here. Failure to install appliances correctly could lead

to prosecution. The use of durable ceramic material in the construction of the fuelbed components ensures long and trouble free operation. The fire must only be operated with a fender which meets the criteria described in the rear of this book. The control lever is located at the top right hand side of the fire. Depressing the control lever fully operates the igniter and lights the pilot flame and ignition rate gas. This infrared signal requires direct line of sight from the handset to the sensor on the fire to ensure good operation. To turn the product off, firstly remove the ashpan from the fire. Any damaged parts must be replaced by contacting your dealer or telephoning Flavel Fires on the number stated on the rear cover of this book. Coals must only be replaced with a complete and genuine replacement set and the fire must never be run with the wrong number or damaged coals. Make sure that the fuelbed base is located centrally in the fire box. Ensure that the fuelbed base fit fully down onto the fuel bed support and is not lodged on the burner. Use the recess's in the front ceramic rail as a guide for placement. See fig. 5 below Fig.

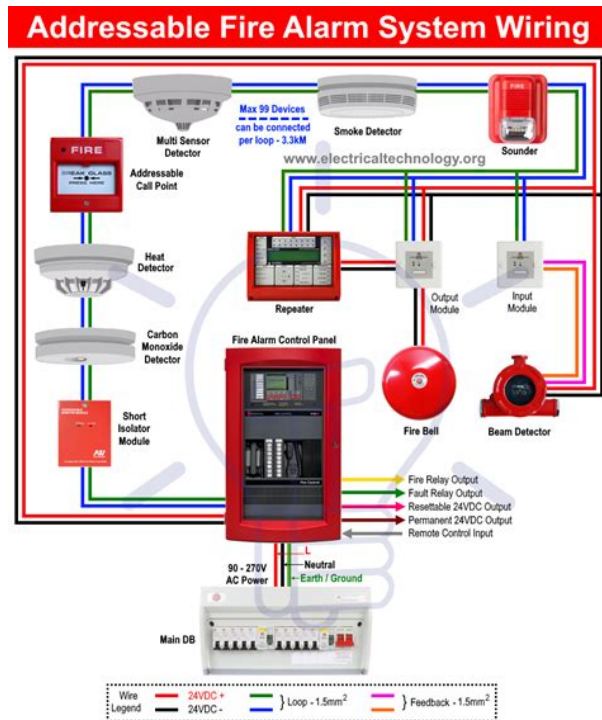

<https://congviendis.vn/vi/3rd-gen-camaro-owners-manual>

5 Select four of the large coals and arrange behind the front row of coals, ensuring that flame paths as indicated below are not interrupted, place one of the small coals at each end of the second row. This appliance uses fuel effect pieces containing Refractory Ceramic Fibres R.C.F., which are manmade vitreous silicate fibres. Excessive exposure to these materials may cause temporary irritation to eyes, skin and respiratory tract. The part numbers of the user replaceable parts are as follows, these are available from Flavel Fires who may be contacted at the address shown on the rear cover. If they dont have the manual then ring Caress HE.Details user manual, includes layout of the coals arrangement. For a free copy of this Yes go to ths link, took me ages to find but when i put in hte serial number it can straight up, but can you tell me where to buy the replacement. Hand these instructions to the user. CANNON CARESS 28224G User s guide, 6 Jul 2009 Does anyone know where i can download Cannon Caress 928224 7kw DFE PDF Manual. Looked everywhere on the net, maybe someone. It comes with all the original installation manual and handbook including the instructions for the positioning of the coals. It offers yellow or blue flame options and heating control levels.You are the light of the world. Also be aware that due to the fire producing heat the interior of the fire may become marked over time through general wear and tear which is quite normal and to be expected. The inside of the glass may also require cleaning from time to time due to condensation that may form on the inside of the glass. Please also note that whilst soot deposits on a gas fire are quite normal and to be expected, they will be more visible on a pebble fuel effect. For more detailed information about Flavel products or to request a sales brochure simply click on the following link to the Flavel Website Whatever your requirements you are always guaranteed a warm welcome by our friendly sales team. You must have JavaScript enabled in your browser to utilize the functionality of this website. Deliveries will commence from Monday 6th January 2020.

We wish all our customers Merry Xmas and Happy New Year This fire features the beautiful coal fuel effect and would look great in any living space. To allow you to calculate the recess needed you must subtract the rebate by the thickness of the back panel. To do this our sales team will contact you via telephone or email to confirm your delivery date with you. We ask that all your contact information is up to date to prevent any delays. However due to manufacturer lead times some products may take 7-14 working days for delivery. Our delivery team will help you place your fireplace in the room of your choice. However this is only a ground floor service at present. We ask that the drivers call you 30 minutes before the time of arrival to give you time to get ready for your item. If you request a fitting when you place your order, we shall send out one of our Gas Safe registered fitters to conduct a free survey to see your requirements. From here we can offer you a price and time slot for the fitting. Here you can browse a vast range of stoves, fire surrounds, wall mounted fires and inset gas and electric fires. Our helpful sales staff are happy to demonstrate these units for you and assist you in finding the right fire for your home. From here we will let you know when we expect the item to be back in stock, and also offer you a choice alternate products within our range. Should these options not be to your liking, we will provide a full refund. If the fire has a fault on delivery we will exchange the faulty item with a replacement unit. We are happy to provide you with the appropriate contact details to get you to the right department. This fire features the beautiful coal fuel effect and would look great in any living space.

Sirak Peralta 20200323T1743510500 How to Remove the Door Panel DOK Sirak Peralta 20200323T1738110500 How to Change the Universal Lock Sirak Peralta 20200323T1735300500 How to Change the Premier to Universal Lock Sirak Peralta 20200323T1731450500 How to install the NL keypad For added security, the door is not removable on Cannon Safes. For added protection, Cannon Safes are not equipped with a key backup. The size of the knockout is. Every Cannon Safe model comes with a knockout. If you decide to use it for any reason please be careful not to alter the hole in any way as it may void your warranty and damage the integrity of the safe. What is it for Does it effect the fire rating 01.collins.shopping 20181213T1000220600 There is a small hole in the back of my safe. What is it for Does it effect the fire rating. This is a knockout that allows you, if you so choose, to run your own electrical through to the safe so you can use dehumidifiers or lights that require power. This does not effect fire rating, as long as the hole is not altered in any way. No, your combination is stored within the locks computer and will not be affected if you change the battery or if the battery dies. The knockouts are small enough that they will not be an issue if a fire event occurs. As added protection though, StackOn offers an installation kit which includes seal that expands for extra protection. For added security there is no other way to get into the safe. However, the battery compartment is located on the outside of the safe so you can still change the battery and regain access to your safe, even if it dies. The combination will remain the same. The factory combination for Cannon Safes is 123456 The only Cannon Safe model that comes with a builtin power supply is the Cannon 1965 premium model. However, all Cannon Safes come with knockouts in the back to allow for the wiring of electrical systems to use with lights or dehumidifiers.

When using the knockouts be careful not to make them any bigger. This can void your warranty and compromise the integrity of the safe. We also have cordless dehumidifiers and light kits available.

When the indicator beads turn pink, the silica gel is saturated and needs to be reactivated. To reactivate the beads, place the entire unit do not disassemble in the oven at 325 Fahrenheit for at least 3 hours. Let the unit cool enough to handle, then return to the safe. Note the indicating beads will gradually turn blue once reactivated. Angela AvilaMcDonald 20181213T1003110600 What is the proper way to accept a safe delivery Sirak Peralta 20181213T1003280600 How often should I change my battery. The frequency that you will have to change your battery varies by user. If you use your safe multiple times a day you may have to change your battery more frequently than someone who uses the safe three times a week. Just to be safe, we suggest changing the battery of your safe twice a year. Signup here so you never forget! Sirak Peralta 20181213T1003380600 What kind of battery should I use. We recommend using an all alkaline Duracell or Energizer battery with an expiration date of five years in the future. This will ensure optimal lock performance. Angela AvilaMcDonald 20181213T1003500600 How do I use an electric dehumidifier in a safe without a power outlet. An alternative option to an electric dehumidifier is our silica gel dehumidifier, which does not need electricity to operate. When using the knockouts be careful not to make them any bigger. This can void your warranty and compromise the integrity of the safe. Angela AvilaMcDonald 20181213T1003590600 Where are Cannon's safes manufactured. Cannon Safes are made and manufactured in Mexico. Angela AvilaMcDonald 20181213T1004100600 How long does the "lockout mode" last. Lockout mode lasts five minutes. Refrain from pushing buttons while the battery connects or the timer will reset.

Angela AvilaMcDonald 20181213T1004260600 What size screws or anchors should I use to bolt my unit to the floor. Angela AvilaMcDonald 20181213T1004370600 Can I upgrade my digital keypad to EMP. No, the wiring configuration in the digital keypad is different when compared to the EMP lock. Angela AvilaMcDonald 20181213T1004480600 Can I replace the digital keypad with a mechanical lock. Digital locks provide secure and fast access to your valuables. Safes with digital keypads cannot support a mechanical lock because they lack specific features to guarantee protection. Sirak Peralta 20181213T1004580600 Does my warranty cover me if I lost the combination to my safe Electronic and EMP locks carry a oneyear warranty for labor and a lifetime warranty for parts. Sirak Peralta 20200602T1013000500 What should I do if my safe experiences fire, flood, or burglary. Please call us at 702 9102491 and explain the situation. We will ask for certain information to process the claim but rest assured knowing your Cannon Safe is covered for the lifetime of the safe if you experience one of the unfortunate events mentioned above. Sirak Peralta 20181213T1005300600 What if the paint on my safe is damaged If you need assistance with paint warranty please call us at 8002421055. Sirak Peralta 20200602T1014150500 How can I contact a store support representative Our hours are Monday to Friday 6 am to 4 pm PST. Please be aware that our hours may vary during holidays. Please keep in mind the hours of operation are the same as they are for phone calls. Sirak Peralta 20200602T1026520500 Where can I find customer service or technical support Closed on major holidays. Sirak Peralta 20181213T1006010600 Where can I find the model number for my safe Sirak Peralta 20181213T1006110600 Where can I find the serial number for my safe The serial number will be on a small silver sticker.

Sirak Peralta 20181213T1006350600 Where can I find an Owner's Manual for my safe Within it, you should be able to find answers to most of your questions. Please take a moment to read the manual to get a full understanding of all the features associated with your Cannon Safe. Sirak Peralta 20181213T1007040600 How do I reactivate my Silica Gel Dehumidifier To reactivate the beads, place the entire unit do not disassemble in the oven at 325 Fahrenheit for at least 3 hours. Note the indicating beads will gradually turn blue once reactivated. Sirak Peralta 20200602T1028190500 How do I buy extra shelves Looking at the image, determine which shelves you need. Keep in mind that we no longer make shelves for past models. To produce and ship the shelves it will take approximately 58 weeks. If you have any questions please contact customer service at 702 9102491. Put the ring back onto the keypad and twist counter clockwise This is a number that is available only

through the factory, please see "How do I get my MRC Code" if you need help. Leave the safe door open and in the locked position locking bolts should be visible. With the door pulled open, put the safe in the locked position by turning the handle clockwise. You should be able to see the protruding bolts on the safe door. If there is one 1 long beep after entering the code, the lock did not recognize the code, slow down. You will hear a double beep. You will hear a double beep. You will hear a double beep. If you hear a long beep, the old code is still valid. Now don't forget it because you will need it if you want to change the combination again! With the door pulled open, put the safe in the locked position by turning the handle clockwise. You should be able to see the protruding bolts on the safe door. If there is one 1 long beep after entering the code, the lock did not recognize the code, slow down. You will hear a double beep. You will hear a double beep. You will hear a double beep.
