I will no doubt BURN the Turkey or it may just come out RAW, if I cant get the instructions for this cooker before Xmas. Cheers Sandra. The problem I had was setting the clock on a single Diplomat oven, with no clock button. Heres my solution DIPLOMAT OVEN OPERATING INSTRUCTIONS The Diplomat single oven is controlled by two knobs and a set of buttons along the middle of the control panel. The left knob sets the temperature of the oven, while the right knob selects the function to be performed, e.g. fan oven, grill, etc. Here's how to set the clock First press simultaneously the first two buttons to the left of the control panel. They are marked as a Bell symbol Alarm, and a steaming Cooking Pot Start of Cooking Time. When the desired time has been reached, leave it for a few seconds, and it will remain set at this time. Any further changes to the displayed time will require this procedure to be repeated. Hope this helps!
